

Cash Management SOP

Currency Chest Operations

Deposits into and withdrawals from the currency chest are reported to the central bank the same working day. Soiled notes are segregated and remitted separately from re-issuable notes.

Cash Holding Limits

Each branch has a retention limit set by the regional office based on average withdrawal demand. Cash above the limit at end of day is moved to the linked currency chest by the next cash movement.

ATM Replenishment

ATMs are replenished by the outsourced cash agency under dual control with the branch officer's joint sign-off. Cassette seals are verified before and after loading and the seal numbers recorded.

Counterfeit Notes

A note identified as counterfeit is impounded, stamped, and reported. Up to four pieces in a single transaction are handled at the branch; five or more are reported to the police with a monthly consolidated statement.
